

24/7 Managed CSOC Services for Customers Worldwide

- T&M Israel Group, Israel's foremost security organization, has joined forces with IBM Security to offer innovative and comprehensive managed cyber security services.
- At our one-of-a-kind integrated Security Operation Center (SOC) IBM's world leading Analysts operate IBM's latest Security Information and Event Management Technology (the QRadar SIEM) to continually monitor, detect and respond to threats.
- T&M's Cyber modular and scalable solutions are specifically tailored for all kinds of customers including SMBs & SMEs, which are most vulnerable to cyber-attacks.
- T&M's Cyber advantage stems from fusing physical and electronic security with cyber security to provide holistic solutions adapted to each customer's needs.
- Real-time monitoring for early detection, analysis and response, before damage develops.
- Automated vulnerability & risk assessment and compliance verification services.
- Now available to customers worldwide at attractive terms.

The Essentials of CSOC Services

- The cyber threat has evolved from a data security risk into an existential risk to the organization and is increasingly difficult to defend against.
- External and internal threat vectors expand, from organized crime and hackers to frustrated or greedy insiders. The intensive use of mobile communication and mobile computing devices coupled with the mixed use for business and private applications, stretch and blur the boundaries of the organization's ICT system more than ever.
- The severe consequential impact of computing and data lockup has ushered in an era where your business may be one mouse-click away from permanently closing its doors.
- Sophisticated social engineering attacks necessitate more than protective technologies, it necessitate to detect, identify, and respond to security incidents in real-time, to halt an attack in action, avoiding the damage to the organization's infrastructure, services, and customers.
- **Therefore, a Cyber Security Operation Center become so imperative to the Resilience and survivability of organizations**
